

COATED ABRASIVE ROLLS

COATED ABRASIVES

FILM ROLLS

Norton Metalite precision Microfinishing film rolls are micron graded film backed abrasive products designed for Automotive Power train components like camshafts, crankshafts, transmission parts, etc., speciality roll polishing and general Microfinishing.

These Microfinishing films from Norton combine a premium micron graded aluminium oxide abrasive with a proven 5 mil or 3 mil polyester backing. The product design includes a patented anti-slip back coating with low abrasion that minimises tooling wear and greatly reduces problems associated with slipping and stripping. The design also provides excellent anti-loading properties in water based coolants and provides excellent resistance to chemical attack.

NORTON Metalite Q131 Micro-finishing Film Roll

Industry	Primary Auto
Usage	●
● Direct Use	● Probable Use

NORTON METALITE Q131 MICROFINISHING FILM ROLL

FEATURES

- ▶ Tough Premium Aluminum Oxide grain
- ▶ 3 mil Polyester backing
- ▶ Electro-statically close coated grain
- ▶ Special Patented Anti-slip back coating

BENEFITS

- ▶ Good for medium to high pressure applications; Long life; Good cut rate
- ▶ Moderate strength; Resistance to tearing; & uniform grain coating
- ▶ Fine scratch-free finishes
- ▶ Minimises slipping during use

NORTON Metalite Q151 & Q153 Micro-finishing Film Roll

TYPICAL APPLICATIONS

- ▶ Crankshaft & Camshaft lapping
- ▶ Piston rod polishing

Industry	Primary Auto

NORTON METALITE Q151 & Q153 MICROFINISHING FILM ROLL

FEATURES

- ▶ Tough Premium Aluminum Oxide grain
- ▶ 5 mil Polyester backing
- ▶ Electro-statically close coated grain
- ▶ Special Patented Anti-slip back coating

BENEFITS

- ▶ Good for medium to high pressure applications; Long life; Good cut rate.
- ▶ High strength; Resistance to tearing; & uniform grain coating.
- ▶ High cut rate at acceptable finish
- ▶ Fine scratch-free finishes
- ▶ Minimises slipping during use.
