

UNIFIED WHEELS

Unified Wheels

Beartex Unified Polishing wheels are made by compressing layers of Beartex flat stock to obtain wheel of different densities. Beartex Unified Wheels serves as a cost effective option for light duty deburring, decorative finishing, rust removal and cleaning applications. Ideally suited for decorative finishing on brass, SS, watch straps, dairy & kitchen equipment. By choosing the right grade and density, Beartex Wheels are effective substitutes to Set Up wheels. This helps avoid messy operation of making the Set Up wheels and the heavy pollution associated with them.

PRODUCT OFFERINGS

- ▶ U Series Beartex Unified Wheels
- ▶ P Series Beartex Unified Wheels
- ▶ Q Series Beartex Unified Wheels

TYPICAL APPLICATIONS

- ▶ **CLEANING**
 - Rust removal and preparation
 - Surface preparation
- ▶ **POLISHING**
 - Dent removal on Brass, SS & Auto Components
 - Polishing and blending of upstream Coated Abrasive grit lines
- ▶ **FINISHING**
 - Matte finishing on SS & Brass Hardware
 - Imparting high glossy finishes
- ▶ **DEBURRING**
 - Deburring of milled and stamped components

U Series Beartex Unified Wheels

Ideally suited for matt finishing on brass and SS. These wheels are suited for low pressure applications and generally used in densities 1 & 3. An ideal product for cleaning and descaling applications.

ADVANTAGE**

P Series Beartex Unified Wheels

These wheels are non smearing and can withstand higher pressures. Ideal wheel for matt finishing on SS and final finishing of precision parts. Suited for dent removal applications on watch straps and watchcases. Extensively used for light deburring of burrs caused by stamping, punching and other machining operations.

Q Series Beartex Unified Wheels

These wheels impart a special hairline glossy finish on components as they are made with special fibres and resins. The unique resin system has a high resistance to wear and hence the wheels are long lasting. Ideally suited for imparting high glossy finish and deburring applications. Q series wheels are cost effective options for deburring SS, alloy steel and other milled and machined components.

Large diameter Q Series Beartex Polishing Wheels are extensively used in imparting high glossy finish on Bright bars, SS rods and piston pins. Imparts special finishes on jewellery, surgical instruments and medicinal implants.

Widths	12.5 - 150 mm

NON-WOVEN ABRASIVES

UNIFIED WHEELS

NEX Unified Polishing Wheels

The NEX Series Unified Wheels from from Saint-Gobain Abrasives, US, are made from a high strength fibre and a unique, special resin system. This combination of fibre and resin helps impart very high cut rates on the job material.

NON-WOVEN ABRASIVES

BETTER BEARTEX POLISHING WHEELS

FEATURES

- ▶ Available in a wide range of specifications
- ▶ Flexible
- ▶ Gentle action
- ▶ Non metallic
- ▶ Quiet operation and no dust generation like set up wheels
- ▶ Self threading bore
- ▶ Ideal light deburring media

BENEFITS

- ▶ Can be used for a variety of applications
- ▶ Can conform to the shape of the workpiece
- ▶ No danger of changing job geometry
- ▶ Does not oxidise, rust or create metallic contamination
- ▶ Better working condition
- ▶ Can be used on any taper spindle similar to cotton wheels
- ▶ No secondary burrs

Note: Beartex Unified Polishing Wheels can be used on polishing machines, bench motors, automatic and special purpose machines.

Availability: Abrasives: SiC & AlO
Abrasive Grits: 120 to 320
